

THERMAL SEPARATION TECHNOLOGIES

Services

Specializing in thermal separation and thermal product treatment, we provide you with tailored solutions for your existing or new system, changes or improvements in capacity, increase energy efficiency, improve reliability, retrofit for new products, and optimization of runtimes and cleaning cycles.

We offer pre-studies of your process and a full evaluation of your existing evaporator, crystallizer and dryer system, and generate a customized optimization plan. We design and supply your new evaporator, crystallizer and/or dryer system, modify existing equipment of any make and model, or a combination to make the equipment fit your needs while maintaining your budget. From a single component to a turnkey project, we can help you.

About GLM Hydro LLC

GLM Hydro is a North American based company with over 30 years of experience in falling film and forced circulation evaporation and crystallization technology applications. We are an exclusive partner and dryer representative of Lübbers Anlagen- und Umwelttechnik GmbH, an award winning manufacturer of drying systems. Lübbers is a family owned company that has been active in the food and dairy market for over a century. Through our exclusive partnership with Lübbers we can provide you with complete process solutions – from concentrated liquids to dried powders.

EVAPORATION, CRYSTALLIZATION AND DRYING TECHNOLOGY FOR THE FOOD, DAIRY AND CHEMICAL INDUSTRIES
