

THERMAL SEPARATION TECHNOLOGIES

Evaporators & Crystallizers

Our GLM Hydro team has extensive experience with various products and in numerous applications which makes us your ideal provider for all evaporation, crystallization and drying needs. We make use of innovative and proven designs, to get you the best solution possible.

GLM Hydro offers customized, standard, or modular evaporator and crystallizer systems as well as thermal product treatment systems for pasteurization and sterilization. Direct steam injection, indirect heating, and flash cooling systems are designed to meet your specific requirements.

Scope

- Tubular Falling Film Evaporators
- Forced Circulation Evaporators
- Crystallizers
- Direct and Indirect Thermal Product Treatment Systems
- Flash Cooling Systems
- Mechanical- or Thermal Vapor Recompression Systems for Evaporators and Crystallizers
- Product Recovery Systems
- CIP Systems

EVAPORATION, CRYSTALLIZATION AND DRYING TECHNOLOGY FOR THE FOOD, DAIRY AND CHEMICAL INDUSTRIES
